Varian to Distribute Vertual's 3D Virtual Reality Training Systems

Thursday 27th August 2009

Varian Medical Systems International AG and Vertual Ltd have announced their execution of a distribution agreement that will enable Varian to offer Vertual's VERT range of 3D Virtual Reality Radiation Therapy Training systems for sale alongside its radiation therapy products.

Arthur Kay, Director of International Marketing and Sales at Vertual said, "We are delighted to be working with Varian in this way. Our products have been designed to provide radiation therapy professionals with a highly realistic and compelling training environment in which to learn and practice the skills they need. Working with VERT is just like working with a real medical accelerator costing millions of dollars."

However, in addition to controlling the linear accelerator using the same controls and displays as used on the real equipment, in VERT a patient's internal anatomy can be visualised including tumours; clinical and planning target volumes; neighbouring organs at risk and absorbed dose distributions. Treatment plans and deliveries can be performed and practiced including the most advanced techniques like Varian's RapidArc® .

Michael Sandhu, Vice President, EMEA Sales & Marketing Operations, Varian Medical Systems said, "Having Vertual's products in our portfolio will enable us to offer a total training package, designed to provide our customers with everything they need to adopt and implement the advanced capabilities of our equipment in a highly cost effective manner. VERT enables highly complex treatments to be understood quickly and intuitively giving staff the skills and confidence that they need in the use of radiotherapy equipment to deliver these advanced life saving treatments."

About Vertual Ltd

Vertual Ltd. is the leading provider of virtual reality training systems in radiation therapy. Located in Hull UK, the company has furnished higher education institutes and teaching hospitals throughout the UK with VERT radiation therapy training facilities. In 2008 the company embarked on a programme to develop international markets for its products and VERT systems have been sold to training centres and skills labs in Denmark, Holland and Canada.
